

ElevatorIQ

INDEPENDENT ELEVATOR INTELLIGENCE

The Intelligence Layer Your Elevator Contract Never Came With

For Hospital Facilities Teams | Vendor-Neutral | No Affiliations | Confidential

WHAT IT IS

ElevatorIQ is an independent elevator procurement intelligence platform. Upload your maintenance invoices, contracts, or modernization bids as PDFs. Get back a structured, vendor-neutral analysis report in 48 hours — written with 15 years of elevator industry expertise built into the engine.

No vendor contact. No obligation. No guesswork. Just intelligence.

WHY IT MATTERS FOR A HOSPITAL

\$300K–\$540K

Estimated annual Otis spend
for a 30-elevator hospital

48 hrs

From invoice upload
to full analysis report

\$0

Cost for the pilot
No obligation

Most facility directors have no independent way to verify what they're actually getting for that spend. The invoice arrives. It gets approved. The pattern repeats — for years. ElevatorIQ changes that.

Specific issues it surfaces in hospital accounts:

- **Callback labor billed outside contract scope** — full-maintenance contracts are supposed to cover callbacks, but vendors routinely reclassify them as "out of scope"
- **Proprietary parts markups** — components billed at 40–80% above OEM cost on units where market alternatives exist
- **Automatic escalation clauses compounding unchecked** — 3–5% annual increases over 5+ years can add \$250–\$400 per unit per month without any renegotiation
- **Units over-contracted for their actual duty cycle** — mixed-vintage fleets commonly include elevators on full-maintenance contracts they don't need, at 30–50% excess cost per unit

WHAT THE PILOT LOOKS LIKE

- 1 **Upload** — Send us 3–6 months of Otis maintenance invoices as PDFs. Secure upload. Takes 5 minutes.
- 2 **Analyze** — ElevatorIQ runs a full independent analysis. Report delivered to your inbox within 48 hours.
- 3 **Debrief** — 30-minute call to walk through findings. You leave with a documented, vendor-neutral view of your spend.

If the findings are valuable — and they typically are — we discuss what ongoing intelligence looks like for your portfolio. No pressure. No automatic anything.
